THEATRELIGHT NZ

4 way Compact DMX splitters

TL-DMX-SP-4

These portable Theatrelight DMX splitters can be mounted anywhere- in a cabinet, wall mounted or tied to a lighting bar.

The splitters present a very low load to the DMX line: up to 50 splitters can be paralalled on a single DMX feed, ideal for very large LED displays. The internal circuitry re-shapes any slow edges in the incoming DMX signal and re-transmits the enhanced signal through low impedance, high current RS-485 transmitters.

All input and output DMX lines are isolated from each other by 500 VAC tested insulation.

For long-term reliability in noisy power conditions, no microprocessor is used in the signal path.

The **SP4-5** version is fitted with Neutrik 5 pin XLRs for compliance to the DMX standard. The **SP4-3** is fitted with Neutrik 3 pin XLR for installations which use 3 pin as a standard.

Both the 3 pin and 5 pin version can also be supplied on request with generic brand gold plated XLRs for installations where economy is important.

Features

- Fully compliant with DMX-512 (1990) specification
- Input isolated from outputs to 500VAC
- Outputs are opto-isolated from each other to 500VAC
- LEDs for Power and DMX Input status
- LEDs for DMX status at each of the 4 outputs
- Compact mount-anywhere package
- Components and circuitry ensure long-term reliability
- 3 pin or 5 pin XLR versions in Neutrik or economic generic brands

Specifications

Signal

RS-485 to 1 MBaud, DMX (1990) compatible

Power:

Mains supply 220-240 VAC 50/60Hz, 5 watts
(100-120 VAC 50/60Hz to special order)

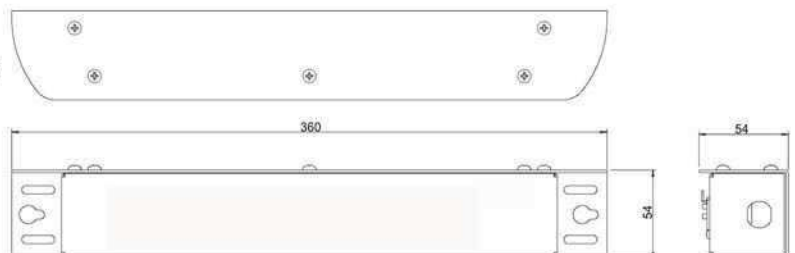

Manisn cable 1 meter 3 core fitted with Aust/NZ 3 pin plug, or tinned ends, or to special order

Construction

1.5mm zinc coated steel construction, black epoxy powder-coated

Dimensions

Weight: 1.4Kg
Packed Weight: 1.6Kg
Packed dimensions:
350mm x 200mm x 160mm
Packed Volume: 0.012m³
